POLYPROPYLENE

ViPrint Polypropylene

ViPrint Polypropylene is designed to meet the creative demands of the graphic arts industry. It has been corona treated on both sides so it can be printed and decorated using different techniques (digital, screen or offset printing, embossing, hot foil and stamping). ViPrint has many exceptional qualities such as infinite hinging capabilities. ViPrint can also be folded and creased using traditional die-cutting techniques. It offers some of the best chemical and moisture resistance in class. The most popular uses for ViPrint are ring binders, bespoke packaging and interior signage.
