

Pop Up Counter Classic

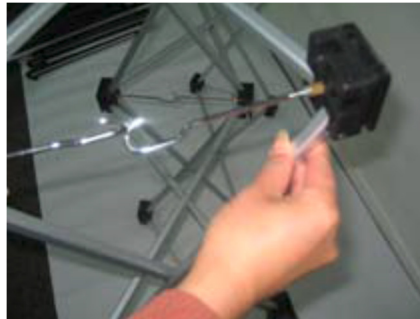

Assembly Instructions

The pack should contain

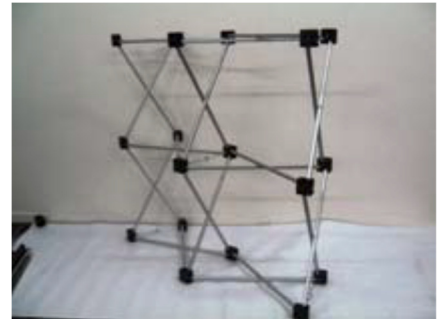

- 1x collapsible frame
- Supports with double magnetised strips
- 2x long straight supports with black connector (vertical support)
- 10x short straight supports (vertical support)
- 8x short curved supports (horizontal support)
- 6 x long curved supports (horizontal support)
- 2 small black 3-way connectors
- Polythene backing sheet

Expand collapsible frame

Push together to make hooks catch

Frame is now stable

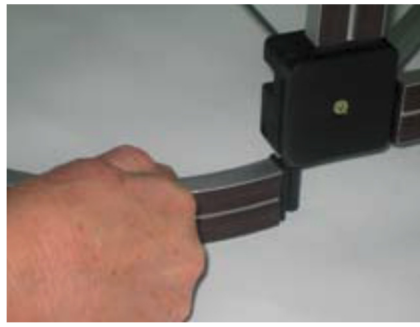

Starting at the front in the middle at the bottom, begin inserting the verticle strips. First put the pointed end into the connector, then slide the top into the groove

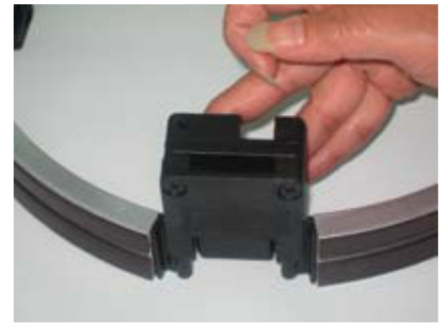

Continue until you have positioned all verticle supports. It is not neccessary to place them at the back in the middle

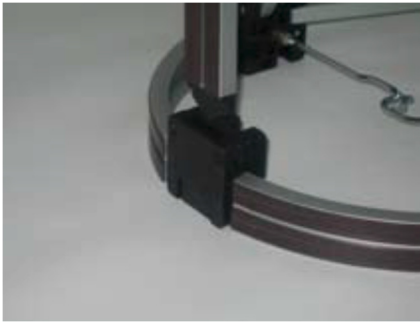

Connect the long curved supports horizontally to support the middle section

Slot the long small curved support to the bottom of the middle section.

Connect the 2 short curved supports at the end with the small black 3-way connector

Insert one of the long straight supports with attached connector by placing the point into the small black 3-way connector

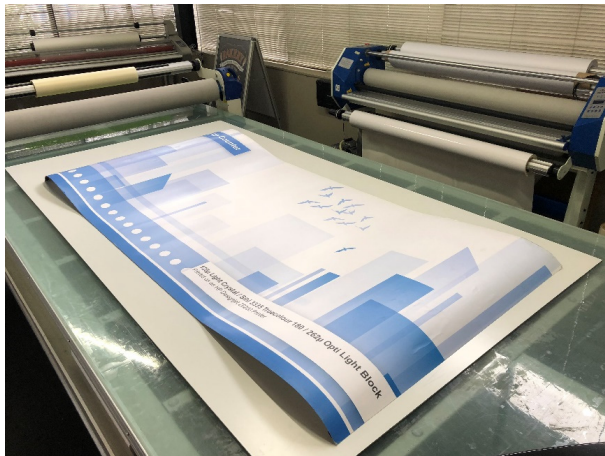

At the top insert the small curved supports into the attached black connector. Repeat on the other end

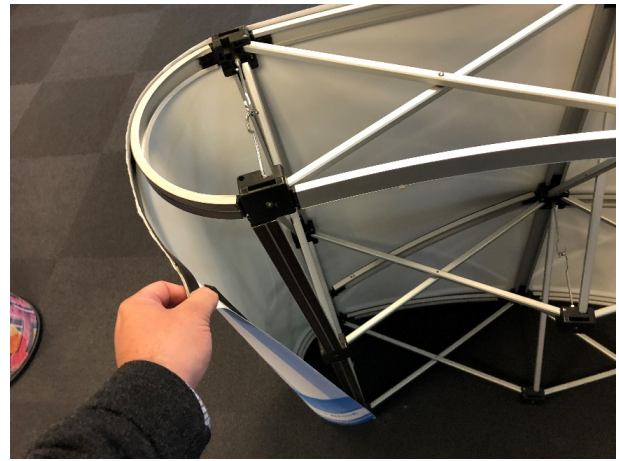

The frame is now complete

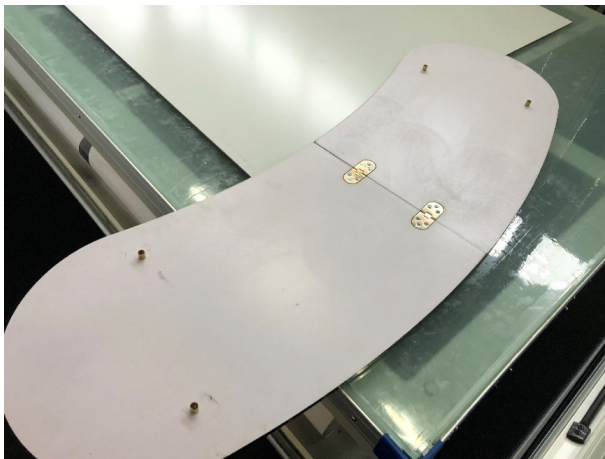

Applying the Graphic

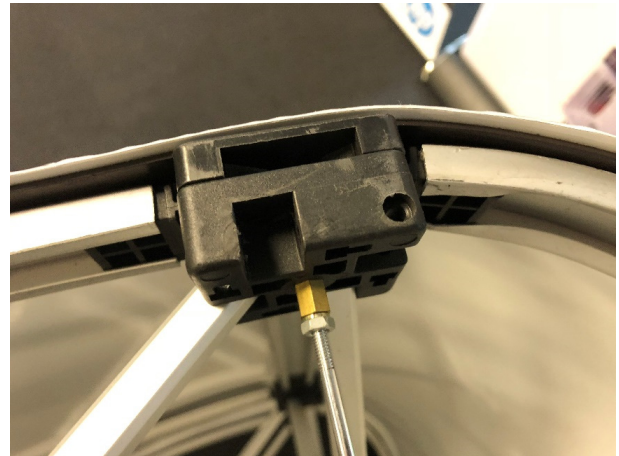

Apply the magnetic strips on the back of your graphic around the edge.

Wrap the graphic around the frame

Make sure your top panel is unfolded and the 4 location pins are installed.

The pins locate into these gaps.

Your Pop Up Counter should look like this when finished.
