

Scimitar Rigid Board Cutters

Scimitar Board Cutters come complete with a stand and basket. Safely cut card and foam boards up to 13mm thick. Scimitar cutters are also great for cutting heavy duty PVC banner material and synthetic print media that other trimmers can sometimes struggle with.

Key Features

- The top section with the blade unit can be lifted 90 degrees to allow for easy loading and unloading of rigid boards and banner material.
- The hinge mechanism for the top section automatically adjusts to the thickness of the board so the blade is always giving you a nice straight cut.
- Available in sizes 1500mm wide and 2500mm wide both with stands and baskets.
- The 1500mm wide is also available as a desktop trimmer without stand.
- Uses a dragged blade system with easily changable blades so you can always cut with a sharp edge and get that perfect finish.
- The Scimitar Cutter can easily cut paper, PVC vinyl, PVC banner and synthetic materials.
- The 2500mm unit is very popular with pull up display printers as it can easily cut all medias used up to 2.5m wide quickly and easily.
